Naik Jitesh Mahabaleshwar

Computer Science Engineering (Data Science) Graduate | Full-Stack Developer

Bangalore, Karnataka, India | +91-7975780385 | naikjiteshm@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Computer Science Engineering graduate specializing in Data Science with hands-on experience in Software Engineering and Full-Stack Development. Experienced in developing web applications, RESTful APIs, role-based authentication and authorization, database systems, and responsive user interfaces. Proficient in Python, Java, JavaScript, C, MySQL, and Git, with a strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Software Development Life Cycle, testing, and debugging.

EXPERIENCE

Full Stack Developer Intern

Jan 2026 – May 2026

Prinston Smart Engineers

- Developed a full-stack Online Tutor platform using MongoDB, Express.js, React.js, and Node.js (MERN Stack).
- Designed and implemented RESTful APIs for tutor management, student booking workflows, and payment integration.
- Implemented role-based authentication and authorization for Admin, Tutor, and Student modules to ensure secure access control.
- Developed responsive user interfaces using modern UI/UX principles and responsive web design practices.
- Integrated MongoDB for data storage, retrieval, and management using CRUD operations.
- Collaborated throughout the Software Development Life Cycle (SDLC), including requirement analysis, development, testing, debugging, and deployment.
- Utilized Git and GitHub for version control and collaborative software development.

PROJECTS

CCTV-XTract – Attribute Extraction System

Python, OpenCV, TensorFlow, YOLOv8, Computer Vision, Machine Learning, Deep Learning

- Developed a computer vision-based surveillance analytics system using Python, OpenCV, TensorFlow, and Deep Learning.
- Integrated YOLOv8 for real-time object detection and CNN models for age, gender, clothing color, and height estimation.
- Applied image preprocessing, feature extraction, and LSTM-based temporal analysis for accurate tracking and video prediction.
- Generated structured JSON outputs and automated PDF reports for security monitoring, incident analysis, and operational reporting.
- Developed a responsive web dashboard using HTML5, CSS3, and JavaScript for real-time data visualization and monitoring.

Online Voting System (I-VOTE)

PHP, JavaScript, HTML5, CSS3, MySQL

- Developed a secure web-based voting platform using PHP, JavaScript, HTML5, CSS3, and MySQL for election management.
- Implemented role-based authentication and authorization for Administrators, Candidates, and Voters for secure access control.
- Designed and managed relational database schemas using MySQL for election, candidate, and voter information management.
- Built responsive dashboards with real-time vote counting, election monitoring, and result visualization.
- Applied secure coding practices to ensure vote integrity, data security, and reliable system performance.
- Enhanced user experience through responsive UI development and efficient database interactions.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C

Software Engineering: Data Structures and Algorithms, Object-Oriented Programming, Problem Solving, Debugging, SDLC

Frontend Technologies: HTML5, CSS3, React.js, Responsive Web Design, Figma

Backend Technologies: Node.js, Express.js, PHP, RESTful APIs

Databases: MySQL, MongoDB

Data Science: Machine Learning, Deep Learning, Computer Vision, TensorFlow, NumPy, Pandas

Data Analytics: Power BI, Tableau, Excel, Data Visualization, Data Cleaning, Dashboard Development

Tools and Platforms: Git, GitHub, VS Code, Jupyter Notebook, Microsoft PowerPoint, Microsoft Word

EDUCATION

Bachelor of Engineering in Computer Science and Engineering (Data Science)

Vivekananda College of Engineering and Technology, Puttur, Karnataka — 2022 – 2026

CGPA: 7.53

Pre-University (PCMB)

Seshadripuram Composite PU College, Bangalore, Karnataka — 2020 – 2022

Percentage: 67.83

CERTIFICATIONS AND ACHIEVEMENTS

- **1st Place – Jnana Sangama 2025 Paper Presentation** for presenting CCTV-XTract, an AI-based Computer Vision project
- Data Analysis – Udemy
- Web Development Basics – IBM
- Data Science Job Simulation – Forage
- IoT-Based Water Irrigation System – VCET
