Summary

Computer Science Engineering graduate specializing in Data Science with hands-on experience in Full-Stack Web Development, Software Engineering, Data Analytics, and Machine Learning. Skilled in developing scalable web applications using the MERN Stack, designing and integrating RESTful APIs, implementing role-based authentication and authorization, and managing relational and NoSQL databases. Proficient in Python, C, Java, JavaScript, MySQL, MongoDB, Power BI, Tableau, Figma, NumPy, and Pandas, with a strong foundation in Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, and the Software Development Life Cycle (SDLC). Seeking opportunities in Full-Stack Development, Software Engineering, Data Analytics, and Data Science to apply technical skills and contribute to innovative, data-driven solutions.

Education

Vivekananda College of Engineering and Technology, Puttur **2022 – 2026**
B.E. in CSE (Data Science) — CGPA: ***7.52*** *Puttur, Karnataka*

Seshadripuram Composite PU College, Bangalore **2020 – 2022**
PCMB — Percentage: ***67.83*** *Bangalore, Karnataka*

New Bharath English High School, Bangalore **2012 – 2020**
State Board — Percentage: ***81.12*** *Bangalore, Karnataka*

Experience

Prinston Smart Engineers **Jan 2026 – May 2026**
Full Stack Developer Intern

- Developed a full-stack Online Tutor platform using MongoDB, Express.js, React.js, and Node.js (MERN Stack).
- Designed and implemented RESTful APIs for tutor management, student booking workflows, and payment integration functionalities.
- Implemented role-based authentication and authorization for Admin, Tutor, and Student modules to ensure secure access control.
- Developed responsive and user-friendly interfaces following modern UI/UX principles and responsive web design practices.
- Integrated MongoDB database for secure data storage, retrieval, and management using CRUD operations.
- Collaborated throughout the SDLC, including requirement analysis, development, testing, debugging, and deployment activities.
- Utilized Git and GitHub for version control and collaborative software development.
- Worked on API integration, database management, and performance optimization to enhance functionality and user experience.

Projects

CCTV-XTract – Attribute Extraction System | *Python, OpenCV, TensorFlow, YOLOv8, Machine Learning, Deep Learning*

- Developed a computer vision-based surveillance analytics system using Python, OpenCV, TensorFlow, and Deep Learning techniques.
- Integrated YOLOv8 for real-time object detection and CNN models for age, gender, clothing color and height estimation.
- Applied image preprocessing, feature extraction, and LSTM-based temporal analysis for accurate tracking and video prediction.
- Generated structured JSON outputs and automated PDF reports for security monitoring, incident analysis, and operational reporting.
- Developed a responsive web dashboard using HTML5, CSS3, and JavaScript for real-time data visualization and monitoring.
- Utilized Machine Learning and Deep Learning models to improve data interpretation and decision-making efficiency.

Online Voting System (I-VOTE)| *PHP, JavaScript, HTML5, CSS3, MySQL*

- Developed a secure web-based voting platform using PHP, JavaScript, HTML5, CSS3, and MySQL to modernize election management.
- Implemented role-based authentication and authorization for Administrators, Candidates, and Voters to ensure secure access control.
- Designed and managed relational database schemas using MySQL for election, candidate, and voter information management.
- Built responsive dashboards with real-time vote counting, election monitoring, and result visualization.
- Applied secure coding practices to ensure vote integrity, data security, and reliable system performance.
- Enhanced user experience through responsive UI development and efficient database interactions.

Technical Skills

- **Programming Languages:** Python, Java, JavaScript, C
- **Frontend Technologies:** HTML5, CSS3, React.js, Responsive Web Design, Figma
- **Backend Technologies:** Node.js, Express.js, PHP, RESTful APIs
- **Databases:** MySQL, MongoDB
- **Data Analytics:** Power BI, Tableau, Excel, Data Visualization, Data Cleaning, Dashboard Development
- **Data Science:** Machine Learning, Deep Learning, Computer Vision, TensorFlow, NumPy, Pandas
- **Software Engineering:** Data Structures and Algorithms, Object-Oriented Programming, Problem Solving, Debugging
- **Tools and Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Microsoft PowerPoint, Microsoft Word

Certifications & Achievements

- **1st Place – Jnana Sangama 2025 Paper Presentation** for presenting CCTV-XTract, an AI-based Computer Vision project.
- **Data Analysis** – Udemy
- **Data Science Job Simulation** – Forage
- **Web Development Basics** – IBM
- **IoT-Based Water Irrigation System** – VCET
